

Single Channel 1394b Triple Transformer Cable Interface Module

Data Sheet

North Hills Transceiver Cable Interface Transformers condition transmit and receive signals in accordance with the specifications of SAE AS5643/1 and IEEE STD 1394b-2008. It incorporates low insertion loss transmit and receive transformers to reject common mode signals and provide isolation between the cable and other electronics at the S100 β / S200 β / S400 β data rates.

Features:

- Semiconductor grade transfer molded package
- Active transmit circuit
- Integrated transmit and receive transformers
- Operates 3.3VDC for low power consumption
- LVPECL transmitter inputs
- S100 / S200 / S400 Operation
- Typical transmitter output - 1300mV at 3.3VDC
- Low transmit and receive jitter
- Withstands 225°C peak solder reflow profile
- Lead Finish: Tin/Lead
- Operating Temperature -55°C to +125°C
- Made in USA
