North Hills 75 ohm to 100 ohm video balun transformers provide an easy and straightforward means of connecting a 100 ohm balanced circuit to a 75 ohm coaxial cable. They are primarily designed for use in SMPTE 292M video networks.

The baluns match impedance in either direction and are precision-engineered for low insertion and excellent return loss and have a wide bandwidth extending from 1 MHz to 1.5 GHz.

*North Hills Application Note 151 - "Wideband Transformers" provides further information on the subject of balun transformers.

**Features:**

- Miniature size for easy integration
- Ideal for SMPTE 292M video data networks
- Insertion Loss 1.2 dB typical
- Return Loss >10dB from 5MHz to 1.2 GHz
- Rise and Fall Times less than 170 ps
- Low Deterministic and Peak-to-Peak Jitter
- Bi-directional signal path

**Benefits:**

- Easily connects twinax or quadrax cable to coaxial cable
- Small size for use in tight spaces
- Lightweight, ideal for weight sensitive applications
- Operating Temperature: -55°C to +125°C
